Work Experience

January 2021 – Present (Remote)

GoWP / QuicklyHire

WordPress Developer

Developed and maintained WordPress websites for businesses across different industries. Responsibilities included website development, redesigns, migrations, custom functionality, performance improvements and troubleshooting.

April 2018 – January 2021 (Cebu City, PH)

Rocket Agency

WordPress Developer

Managed and maintained a wide range of WordPress websites while continuing to develop my skills as a web developer. Gained practical experience with SEO and expanded my knowledge of Elementor, Divi, WPBakery, and various WordPress themes. By this stage, I had become more confident and experienced, while continuing to learn through new projects, challenges, and technologies.

April 2015 – December 2018 (Cebu City, PH)

Sushi Digital Web Design & Web Application Development

Web Developer

This was a significant stage in my growth as a web developer. I continued developing my skills in coding and WordPress while working alongside experienced developers and learning directly from my superior. I was given opportunities to work on real projects, solve problems, and take on new challenges. I also made plenty of mistakes along the way, but each one became a valuable learning experience that helped me improve my technical skills, problem-solving abilities, and approach to development. Much of what I learned during this period became the foundation for the developer I am today.

June 2014 – November 2014 (Cebu City, PH)

Proweaver Inc.

Web Developer

Started my professional career as a Web Developer in a fast-paced environment, gaining hands-on experience in WordPress development and website production. Worked alongside experienced developers while learning industry best practices, responsive web development, and the process of building and maintaining websites. This role became the foundation for my continued growth and specialization in WordPress development.

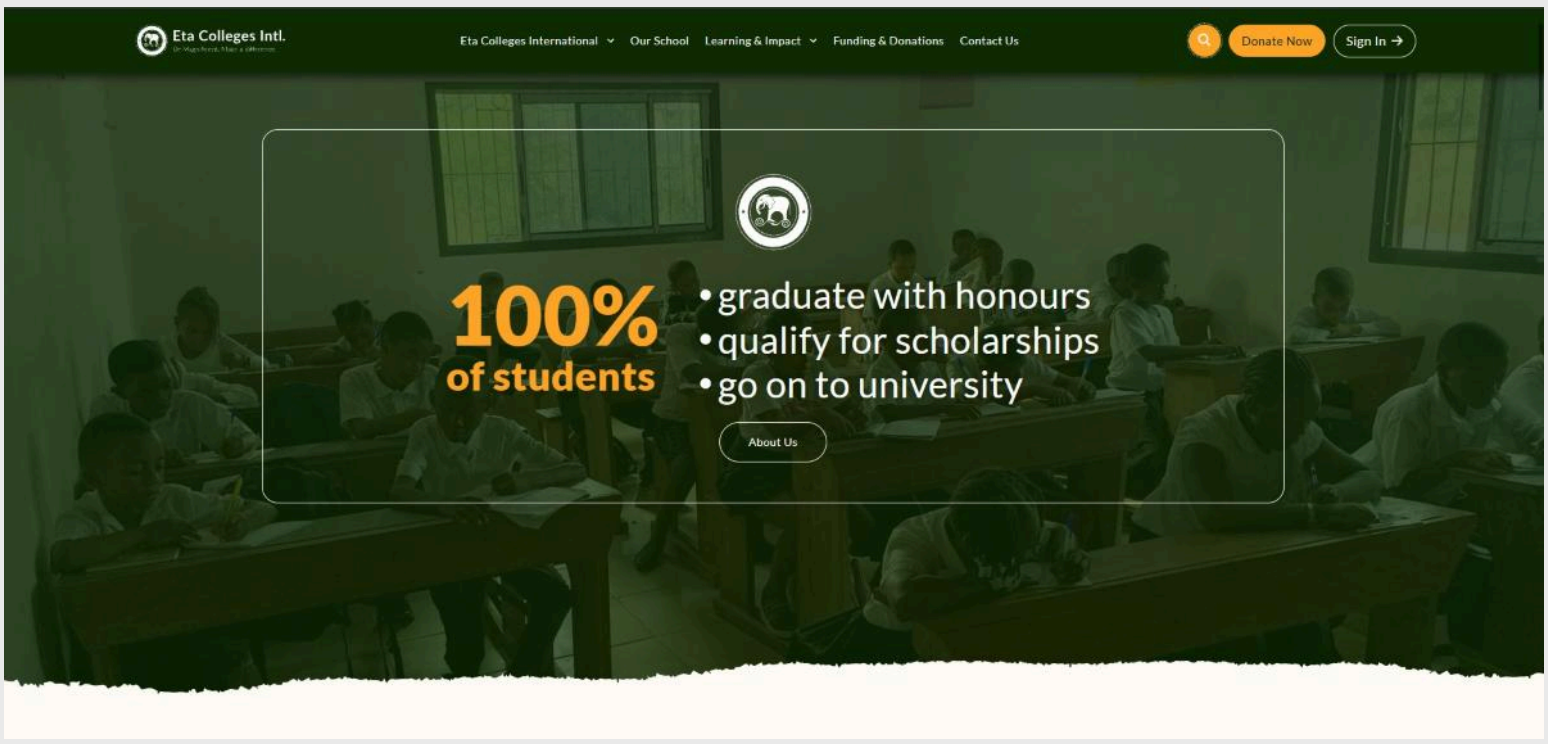

Education

2010 - 2014

Bachelor of Science in Information Technology

Cebu Institute of Technology - University

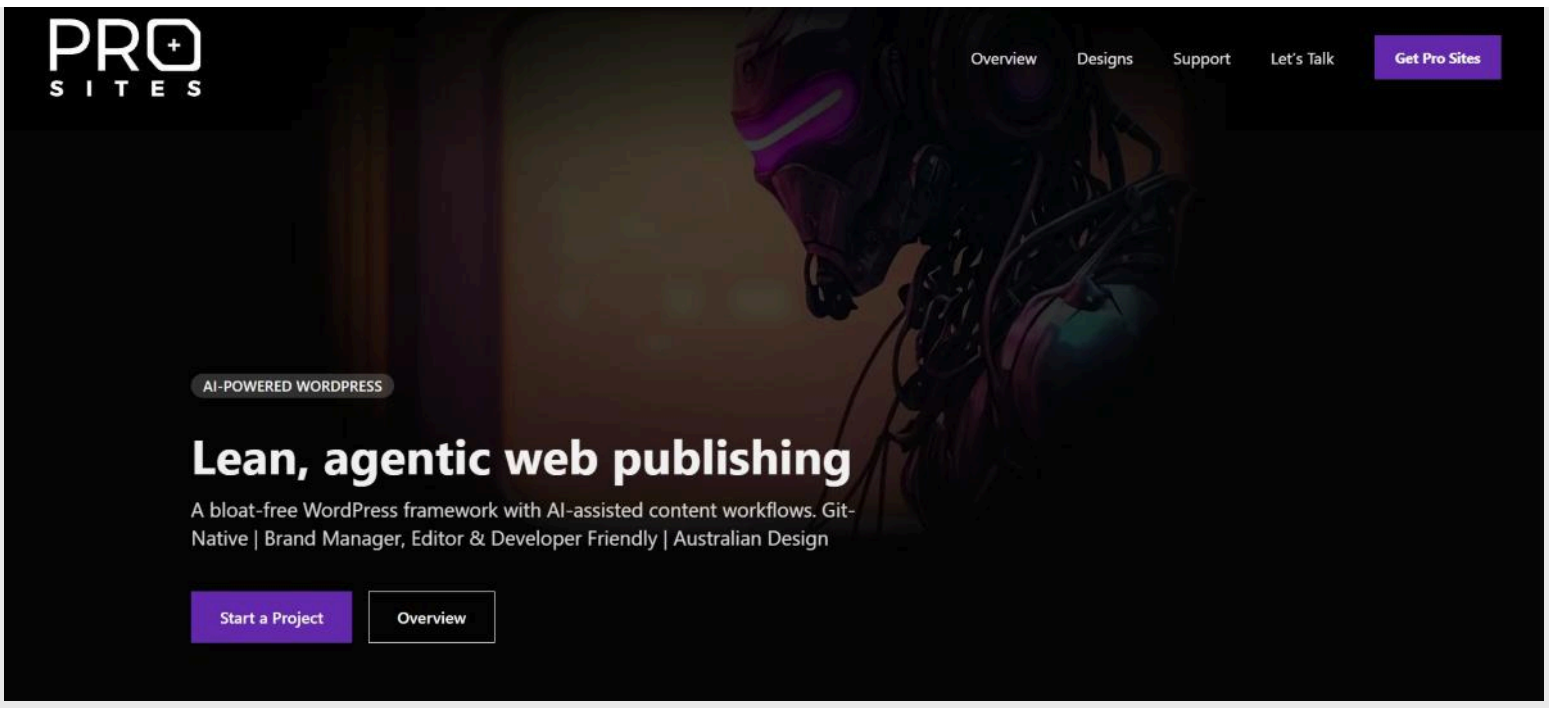

Projects

ETA Colleges

Developed and customised a WordPress website using Elementor on top of a custom theme. Implemented responsive layouts, custom styling, and additional functionality to meet specific client requirements and business needs. Worked on extending and refining the site's features while maintaining a consistent, user-friendly experience across desktop, tablet, and mobile devices.

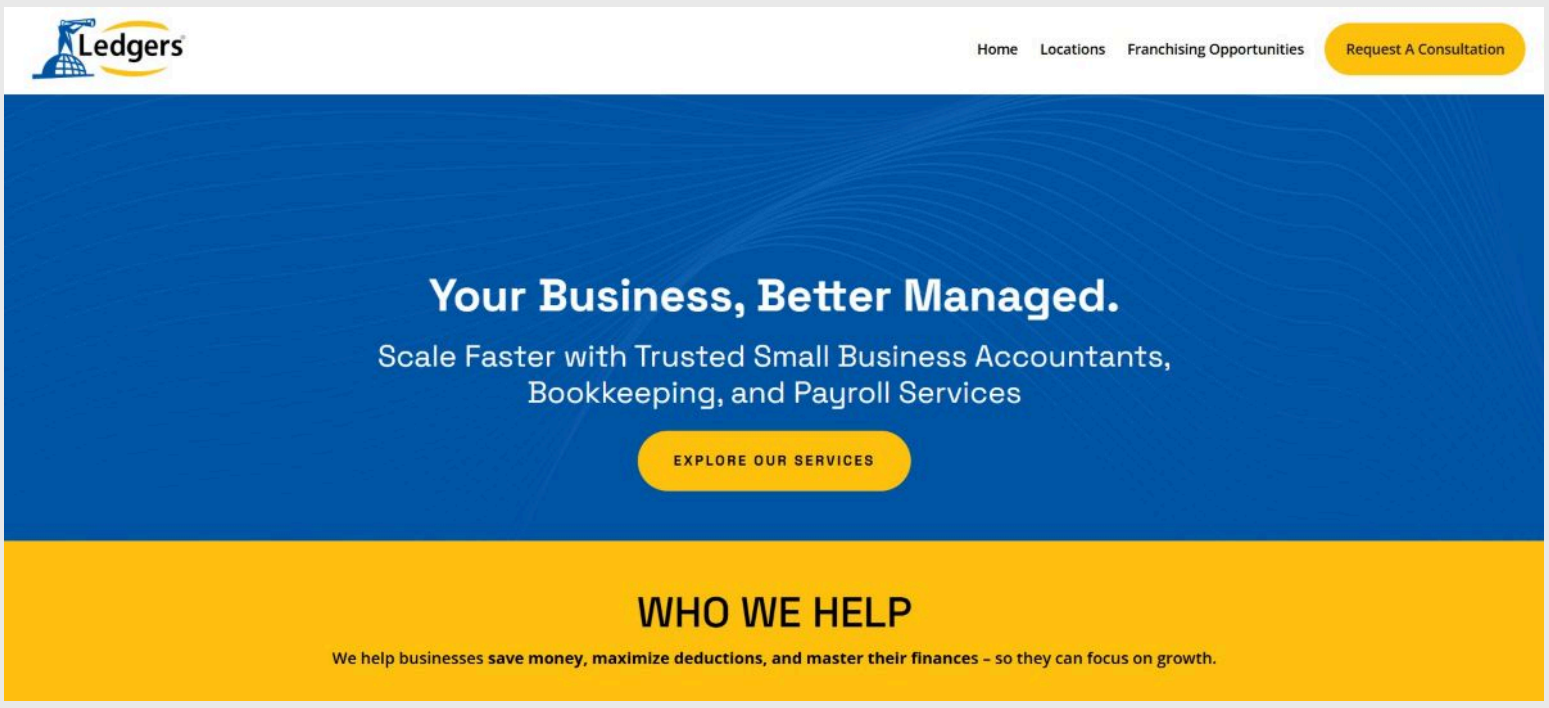

WordPress • Elementor • Custom Plugin • PHP • Custom Code

Pro Sites

Developed and customised a WordPress website based on an existing custom theme and custom plugin architecture, leveraging Advanced Custom Fields (ACF) for flexible and dynamic content management. Extended the site's functionality and built custom content structures based on client requirements, while handling theme customisation, front-end development, responsive layouts, and ongoing feature enhancements.

WordPress • Custom Theme • Custom Plugin • PHP • Custom Code

LedgersUSA

Rebuilt the Ledgers USA WordPress website using Divi, creating custom Divi templates and layouts based on the site's requirements. Developed custom WordPress functionality to enhance the site's content management and presentation, including a dynamic location listing system that automatically organizes locations and their associated pages. Implemented custom PHP shortcodes, featured-image fallback logic, dynamic content retrieval, and additional WordPress functionality to provide a flexible and maintainable website structure.
